Top 10 Reasons Schools Choose Schoohoo

1 Schoohoo is completely free for both schools and the users subscribing to alerts (parents, teachers, students, etc). Schoohoo is a not-for-profit corporation wholly supported through private donations and sponsors.

2 The school does not have to maintain a contact database. The task of keeping contact information up to date is on the subscriber (i.e. parent).

3 Schoohoo can be used for a wide variety of alerts - weather, emergencies, holidays, early dismissals, PTA, reminders, events, etc. All for free!

4 Setup is quick and easy - your district and schools can be sending alerts in just 1 to 2 business days from the day you sign up on our website.

5 Sending an alert is quick and easy - sign in securely via the website, enter the text of the alert, and click the send button. Alerts go out immediately.

6 There is no software to download and install - the entire system is web based with high level encryption and security, and there are no plug-ins required. It works with every major web browser, on Macintosh, Windows or Linux.

7 Schoohoo is universal. A parent can subscribe to multiple schools across multiple districts, all with just one account.

8 Schoohoo has a very simple privacy policy - we don't give out or sell any personal data about our schools or those subscribing to alerts.

9 Sponsor messages are a maximum of 65 characters, text only, and at the end of the alerts. We can work within the strictest of district advertising guidelines. Sponsor-free alerts are available for a small fee.

10 Schoohoo was developed by parents, educators, and technology specialists to cover every facet of an effective, fast and secure alert system.
